The purpose of this time is to address the many things that might cause students anxiety about starting high school. While we have made every effort to address whatever these anxieties might be, there is always a possibility that there is something out there that we haven't anticipated. Please watch and listen for these unanticipated anxieties and address them as you are able. If you note individual students that seem to be having particular difficulty, please bring them to the attention of the Counseling or Administrative staff.

Please be sure to complete the following activities during your Homeroom Time:

1. Covid Precautions: review social contract and new COVID protocols and then open up for students questions. Teachers record any questions that cannot be answered and we will provide a follow up email for the final homeroom time from 2 - 2:45.

2. Community Circle Format for Advisory Discussions:

- ☐ State your name, middle school, clubs, theater, music, and sports interests
- ☐ Two things people may not know about you just by looking at you
- ☐ How you spent your summer
- ☐ Hopes and Nerves about high school

3. Review of Class Schedule

- ☐ Red and White days
- ☐ Yearlong classes vs. Semester based classes
- ☐ Potential attendance rotation (hybrid learning environment)
- ☐ Information contained within class block on schedule i.e. teachers name and room number

4. Letter to Self at Graduation: please be sure to drop these in the time capsule located in the main office when they are completed—you haven't seen disappointment until you see a graduating senior digging around in the time capsule for a letter that isn't there...
